Amgraf's OneForm™ Manager Lite
Personal Forms Server
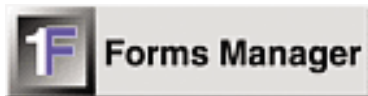

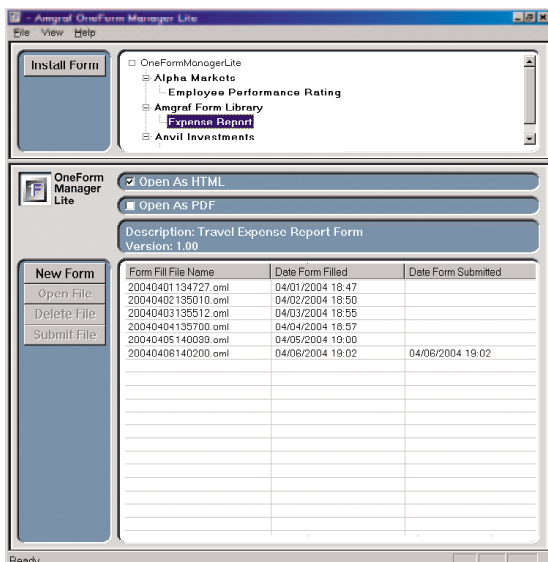

Forms Manager — The OML Button

Smart organizations can easily deploy HTML and/or PDF fillable electronic forms with Amgraf's new *OneForm™ Manager Lite* (OML) software. OML catalogs HTML and PDF e-forms by classification and date, and provides an efficient method to distribute, organize, and manage hundreds of different electronic forms within an enterprise setting. OML-compatible electronic forms can be created in minutes with Amgraf's *OneForm Designer Plus* forms design package. Through OML, users can keep a secure local copy of every electronic form they fill out. When desired, users can locally open, update, and submit filled forms to Internet servers for centralized data collection.

The OML User Interface Shows a List of Electronic Forms

Copy – Retain – Organize – Submit
All Your Electronic Forms

Features:

- Fillable HTML Forms
- Fillable PDF Forms (works with Free Reader)
- E-forms Distribution from Web Sites and/or CD's
- Both Local and Internet Server Form Filing
- XML-Tagged Fill Data
- Secure Encrypted Form Storage
- Windows 2000/XP Client
- No User License Fees
- Free Download

OML is the perfect e-forms management companion to other browser-based reader, viewer, and player programs. OneForm Manager Lite is available free to end-users and can be downloaded and installed by going to Amgraf's web site *www.amgraf.com/pages/omlinfo.html.*
